PROJECTS

Campus Job Portal / MongoDB, Express.js, React, Node.js, Mongoose, Vite, JWT

- Developed a full-stack job portal with role-based access for students and companies, enabling job postings, applications, and real-time status tracking.
- Implemented secure JWT-based authentication and protected routes to manage distinct student and admin workflows.
- Designed RESTful APIs with full CRUD functionality for job listings, applications, and user profiles using Mongoose schema modeling.
- Built a fast, responsive frontend with React and Vite, delivering optimized load times and a smooth user experience.

Tomato Food Delivery / MongoDB, Express.js, React, Node.js, Mongoose, Vite, JWT

- Built a full-stack food delivery web application allowing users to browse restaurants, view menus, and place orders in real time.
- Implemented JWT-based user authentication and secure session handling for login and signup flows.
- Designed RESTful APIs with full CRUD functionality for menu items, cart operations, and order processing using Mongoose.
- Integrated a dynamic shopping cart system with real-time price calculation, built on a fast Vite-powered React frontend.

Roshni / React, Vite (Hackathon Project)

- Built the complete frontend UI for a handmade jewelry e-commerce platform as part of a hackathon team, using React and Vite.
- Designed responsive, user-friendly product browsing and display pages focused on clean visual presentation of handcrafted items.
- Collaborated in a time-constrained hackathon environment, delivering a functional UI within the event deadline.
